Summary

Aspiring Software Engineer with a strong foundation in Python, Java, JavaScript and PHP, and hands-on experience building web applications and some mobile apps. Skilled in object-oriented programming, debugging, version control and REST API development. Developed an AI powered website using FastAPI, NextJS and OpenAI's Whisper model, showcasing problem-solving abilities and adaptability to emerging technologies like AI and the evolving industry landscape. Eager to contribute to innovative software solutions while expanding technical expertise in a professional environment.

Experience

Speech-to-text AI | Freelance Project | February 2025

- Designed and developed a full-stack AI-powered website for speech-to-text transcription.
- Built the frontend using **Next.js**, ensuring a responsive and user-friendly interface.
- Implemented the backend using **FastAPI** to handle API requests and integrate **OpenAI's Whisper** model for accurate transcriptions.

Content Management System (CMS) | Freelance Project | October 2024 - December 2024

- Developed a custom CMS website for a digital design firm using WordPress.
- Enhanced the website's functionality by modifying **CSS** and **HTML** codes and adding dynamic features using **JavaScript**.
- Delivered a scalable and maintainable solution tailored to the client's needs.

Car Dealership Admin & Service Reservation Platform | Freelance Project | September 2024 - November 2024

- Developed a CMS website for a car dealership, exclusively for admin-side sales management and service reservations.
- Designed the frontend using **React.js** and **TailwindCSS** for an intuitive and modern interface.
- Built the backend with **Flask** to handle data processing and API integrations efficiently.
- Delivered a structured system where the website is solely for administrative tasks, ensuring smooth dealership operations.

Buzzy Cafe Full-Stack Application | Freelance Project | February 2024 - April 2024

- Created a full-stack application with a website and mobile app for a cafe.

- Developed the frontend using **React.js** and the backend using **PHP Laravel**.
- Built the mobile app using **Kotlin**
- Delivered a seamless user experience across web and mobile platforms.

Private Market Distributor Application | Freelance Project | July 2023 - September 2023

- Designed and implemented a full-stack application for a private market distributor.
- Developed the frontend using **PHP, HTML, and CSS**, and the backend using **PHP**.
- Created the mobile app using **Java**, ensuring smooth integration with the web platform.
- Streamlined the distributor's operations by providing a unified platform for web and mobile users.

Interior Designer Portfolio Website | Freelance Project | May 2024 - June 2024

- Developed a portfolio website for an interior designer to showcase their work.
- Leveraged **React.js** for the frontend and **TailwindCSS** for modern, responsive styling.
- Deployed the website on **Netlify**, ensuring fast load times and reliable performance.
- Enhanced the designer's online presence with a visually appealing and functional website.
